**Parts washer with brush, made of robust plastic, specifically created for use with BIOPOWER CLEANER.**

## BIOPOWER SYSTEM

Parts washer

Compact and robust plastic parts washer, to clean mechanical parts with the included brush. BIOPOWER SYSTEM is made to effectively and quickly clean mechanical parts and to remove oil and grease without the use of solvents.

BIOPOWER CLEANER is non-toxic and non-flammable. With the help of BIOPOWER TABS, containing billions of micro-organisms, the liquid is regenerated. This keeps it effective over a long period of time, and makes it safe for the operator and the environment.

The parts washer maintains the temperature of the liquid at 38 °C. This results in greater effectiveness of the detergent and the micro-organisms in the liquid.

The provided cover with sealing drastically reduces the evaporation of the solution, allowing to save on electricity and detergent use.

### TECHNICAL SPECIFICATIONS

<b>Power supply</b>	110 V / 230 V 1 phase + T
<b>Working temperature</b>	38°C
<b>Resistor power</b>	1 KW
<b>Power consumption</b>	200W/h (-25% with Eco Mode)
<b>Internal dimensions (tank)</b>	790(W)x420(D)x180mm(H)
<b>Overall dimensions</b>	905(W)x650(D)x1080mm(H)
<b>Max weight for worktop</b>	100 kg
<b>Stainless steel mesh filtration system</b>	Double 700µm +140µm
<b>Movable</b>	4 integrated wheels
<b>Pump</b>	1140 l/h
<b>Empty weight</b>	± 46 kg
<b>Reservoir capacity</b>	55-100 litres
<b>Reservoir capacity for immersion</b>	30 litres

All information in this document is based on our practical experience and/or laboratory tests. Due to the multiplicity of conditions for usage and variable human factors, we recommend that you always test our products for suitability prior to use. At any time, this version of the product specification report may have been revised based on legislation, availability of the individual ingredients or newly acquired information. The current approved version is available upon request.
