

ZEP DYNA CLEAN PLUS R2

Stainless steel pneumatic parts washer, ideal for quick, safe, and economical cleaning of mechanical parts.

The solvent is pumped from the cylindrical tank to the main container through a tube ending with a hollow brush, thus allowing the combination of the mechanical action of the brush with the chemical action of the solvent.

Features a multi-stage filtering system which allows the solvent to remain effective for longer periods.

Comes with a drip-moulding to facilitate parts drying, and, optional, a micro-bubble generator which is installed at the bottom of the container and shoots pressurized air in the the solvent, creating an "effervescent" effect which results in an even more thorough cleaning action.

Technical features:

Working air pressure: 4-6 bar

Dimensions overall : 1105 x 604 x 940 (h) mm

Basin dimensions : 1020x520x230(h) mm

Max weight in basin : 50 kg

Flow rate pump: 20 liters/minute

Cylindrical tank capacity: 90 litres
