

# Product Specification Report

1.0/0916

**Professional analogous ultrasonic parts cleaner. Made of stainless steel and equipped with a stainless steel basket.**

## ULTRASONIC CLEANER AT

28/50/110

Mod. AT 28

Mod. AT 50-110

Professional ultrasonic parts cleaner, made of stainless steel, for the cleaning of components and parts.

Gently removes impurities from metal, plastic, ceramics, glass, circuit boards etc.

The high intensity of the ultrasonic energy, transferred to the cleaning liquid in which the components are immersed, creates bubbles which dissolve dirt with great force. This results in dirt being removed in the most inaccessible places.

For use in mechanical, electromechanical, dental and medical industries and wherever there is the need to clean small parts with difficult-to-reach cavities and holes.

**Use the machine with water based cleaning solutions. Do not use solvents.**

### Description:

- Great efficiency and ease of use
- Main switch with indicator light
- Heating switch
- Power supply 220V- variable frequencies between 25 and 38 KHz
- Analogue timer 0-30 minutes and continuous function
- Adjustable analogue thermostat (20-90 °C max)

### SPECIFICATIONS

MODEL	DIMENSIONS TANK [mm]	CAPACITY TANK [L]	ULTRASONIC POWER [W]	HEATING [W]
AT 28	500 x 300 x 200H	28	600/1200	1000
AT 50	600 x 300 x 270H	50	600/1200	1500
AT 110	650 x 400 x 425H	110	1200/2400	4500

All information in this document is based on our practical experience and/or laboratory tests. Due to the multiplicity of conditions for usage and variable human factors, we recommend that you always test our products for suitability prior to use. At any time, this version of the product specification report may have been revised based on legislation, availability of the individual ingredients or newly acquired information. The current approved version is available upon request.
