

Operating lease, a fantastic alternative to sales

The competition never sleeps. Those who wish to remain in the market must invest in their company's infrastructure. The question is: is it worth buying? With Zep's Leasing offer, the answer is simple. In fact, the purchase of equipment involves capital that would often be more useful for investments in development strategies, personnel or real estate.

The advantages at a glance:

→ Independence

You won't use up your bank's credit line or your bank balance, but will leave liquid assets for further investments. No fixed asset ownership.

→ Planning security

Purchase costs will be spread over the duration of use and fees will be paid with the money saved during or through the use of the equipment. The entire amount will be paid during the period of use.

→ Always in step with the times

Use equipment that is always state-of-the-art, capital will not be tied up in equipment that devalues rapidly and maintenance costs will be kept under control.

→ Support

A team of professionals will be at your side to identify the best solution for your business and take care of administrative matters. No fixed asset management.

BioPOWER SYSTEM

The Biopower System range: the optimal maintenance solution for your company

BIOPOWER SYSTEM

EFFECTIVENESS

Removes stubborn dirt at an operating temperature of 38°C. It can be used with a spray, brush or by immersion. The efficiency of the washing solution is kept constant by the activity of the microorganisms in the solution, which break down dirt and prolong the life of the detergent.

RELIABILITY

Biopower System is a solution developed in accordance with the highest quality standards for materials and structural strength, the ideal system for professional washing of metal parts.

BIOPOWER RANGE

A whole range of Biopower System solutions provides a solution for all washing requirements. The stainless steel or polyethylene structure accommodates washing solutions of up to 100 litres, maximum dimensions of 160 x 70 cm and a load capacity of up to 200 kg.
